### >> Foreword

Dear Shareholder,

The online advertising market continues to experience positive impetus. Double-digit growth rates are the norm and the sector is now perceived as a good example of innovative strength, constructive competition and economic success.

All available indicators suggest that this development will also continue in the upcoming quarters. Advertising expenditure is increasing worldwide and, as previously, online business is benefiting over-proportionately from this growth. Fortunately, the high rates of growth are no longer being generated from a low initial base, but rather are the result of considerably increased budget reallocation, particularly by the major players.

Stock-exchange projections are equally optimistic in terms of the current level of success and future opportunities, with shares in technology and media companies being evaluated in a significantly more positive light than has been the case over recent years. However, in contrast to the valuation bubble seen at the end of the nineties, investors are now focusing on tried and tested business models and companies with proven substance and profitability.

In the 2nd quarter, ad pepper media again succeeded in benefiting from these overall developments; whereby, with a significant increase in turnover of 18 percent, the company was even able to exceed the overall market growth. Nevertheless, the general buoyancy of the market should not disguise the fact that the market itself will again be subjected to considerable fluctuations and consolidation phases in the future. In this connection, it is vital that investment is devoted to long-term structures, products and market shares particularly during growth phases. Only in this way will margins and returns also be secured in the case of a downturn.

The necessity of such was recognised by the company at an early stage and ad pepper media has already aligned itself accordingly by means of a well-planned acquisition, investment and organisational strategy. As a result, over recent months, considerable resources have already been devoted to developing our technology department, new staff have been employed and new systems acquired. Commensurately, this front-end expenditure has had a detrimental affect on results for the current quarter and, by way of exception, a negative result had to be posted. Nevertheless, the question is one of withstanding quarterly pressure exerted by the stock exchange and ensuring that the right long-term steps are taken irrespective of the short-term loss.

Through the acquisition of the global-leading analytics solution website, Nedstat Basic, which was announced in July, we have taken a major step forward to ensuring that this investment is not only re-generated in the mid-term, but also to ensuring that our profit is sustainably increased in the long-term.

Thanks to our unique international structure and homogeneity in terms of market approach, with Nedstat Basic and our exclusive website partners, we have an impressive user-reach that we are, in turn, able to transform into appealing campaigns for our customers by means of our media and direct-marketing services.

Consequently, the company is highly optimistic about the future and is extremely confident that the further course of the business year will bring continually increasing turnover, thereby resulting in considerable growth in operating profits even by the fourth quarter.

Thank you for your confidence shown to us.

The Board

ad pepper media International N.V.

Niels Nüssler

### Result - 2nd quarter and first half year 2005

ad pepper media publishes its interim report in accordance with the International Financial Reporting Standards (IFRS). The previous year's results have been adjusted accordingly.

On 14 July, 2005, ad pepper media announced the acquisition of the website analysis product, Nedstat Basic from Dutch company Nedstat B.V., the leading European provider of website analysis solutions. This acquisition in a new business area involves significant start-up costs and investments that are reflected in the company's financial figures.

The company realized a pleasing 18 percent increase in turnover during the second quarter of 2005 to kEUR 6,411 (Q2/2004: kEUR 5,454). Gross margin for the second quarter 2005 increased by 8 percent to kEUR 2,689 compared to kEUR 2,490 for the second quarter in 2004. The results before interest and taxes (EBIT) for the second quarter of the current year amounts to kEUR –478 following kEUR 89 for the second quarter in 2004. The overall result for the second quarter of 2005 equaled kEUR -278 compared to kEUR 312 in 2004.

Turnover in the first half year of 2005 grew 17 percent to kEUR 11,861 compared to kEUR 10,175 in the previous year. During the same period gross margin increased by 9 percent to kEUR 5,073 compared to kEUR 4,669 in 2004. EBIT for the first half year 2005, amounted to kEUR –478 compared to kEUR 89 in the previous year. Consolidated results for the first six months of 2005 are reported at kEUR –122 compared to kEUR 566 in 2004.

Despite apparent short-term losses linked to the investment in Nedstat basic and subsequent integration costs, ad pepper media expects the acquisition to deliver a significant effect on consolidated results and income by the fourth quarter of 2005.

Liquid assets including short-term liquid fixed asset securities and restricted cash equalled million EUR 22.1 on 30 June, 2005.

### **Business development**

ad pepper media is an international interactive media and direct marketing solutions and services provider currently operating 15 branch offices in 10 European countries and the United States whilst also marketing its services in more than 40 countries. Thanks to state-of-the-art technology, ad pepper media links thousands of small, medium-sized and large websites to make up a premium quality-advertising network which has global coverage and specifically addresses the relevant target groups.

Besides being represented in regional, national and international marketing, the website partners receive a variety of other important products and services, such as adserving, traffic analysis and performance optimization, which are offered by ad pepper media and its associated companies, adapted to the local conditions in every case.

Apart from the gigantic international coverage of approx. 4 billion exclusive advertising contacts per month, advertisers primarily benefit from the multitude of advertising formats and the invoicing model adapted to the advertising objective. Both branding and direct marketing offers can be delivered efficiently to various electronic channels via the company's technology platform. With in excess of 4 million opt-in email profiles of its own, ad pepper media also operates one of the largest pan-European databases. In this context, iLead and mailpepper are well-known brand names, which are unequalled in terms of both quality and coverage.

In February 2005, ad pepper media BeNeLux B.V. acquired the Dutch online marketer ResultOnline B.V. This acquisition strengthened ad pepper media's position in the segment of text-based online marketing and positioned the subsidiary company ad pepper media BeNeLux B.V. at the top of Dutch providers of online marketing solutions.

Further, ad pepper media acquired, beginning of July 2005, the free website analytics solution Nedstat Basic from Nedstat B.V., the European leader in website analytics. With this asset transaction, ad pepper media acquires all the respective rights associated with the world's most frequently used free web-

site analytics solution. Nedstat Basic is an ASP based solution enabling webmasters to measure all the important indicators such as traffic, user behaviour, content and offer performance. Nedstat Basic is actively used by more than 600,000 webmasters on approximately 1 million websites around the world and has been continuously growing since its launch in 1996.

This acquisition highlights ad pepper media's continuing strategy to extend the range of revenue generating solutions it provides to its website partners, plus additional free services and solutions such as Adserving and website analytics which have become indispensable tools for professional websites.

### Online advertising

Online advertising is today an indispensable element of the media mix and has already left classical forms of advertising, such as cinema advertisement or specialist catalogues, in its wake. In this respect, the campaigns are not purely multimedia based, but are also becoming increasingly integrated across the media spectrum in print, TV and radio.

Alongside increased use of the Internet throughout all levels of society, the constantly accelerating spread of broadband connections has also contributed to the additional growth in online advertising. Particularly high-grade rich media formats could well boost the reach and, consequently, enhance appeal for advertising companies. Fortunately, the increased demand is also reflected in pricing structures, whereby, as previously, online advertising continues to offer significantly greater cost-effectiveness in comparison to other media forms.

Moreover, online distribution channels are not just successful for large companies. Thanks to precisely tailored target-group contacting, success-level quantification and intelligent, automatic placing, email and search engine marketing is enjoying ever-greater popularity.

The intensified sensitivity towards spamming and unwanted advertising has resulted in a considerable improvement in quality. Well-structured, agreement-based campaigns impress with high response levels, whereas poor campaigns are filtered out long before the user-contact point.

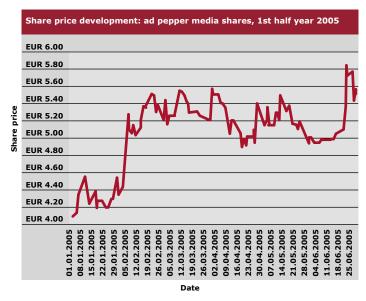

Overall, it is apparent that online advertising has come of age and now enjoys far greater professionalism on the part all those involved. This, in turn, has opened the way for campaigns offering intensified reach and enhanced target grouping on both the international and national level as well as increasingly on a regional level.

#### The share

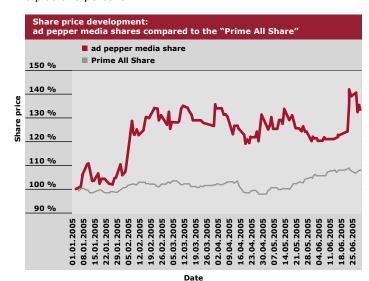

Despite cyclical fluctuations, the price of ad pepper media shares again saw positive development in the first six months of the current business year with a 33 percent increase from EUR 4.11 on 3 January, 2005 to EUR 5.48 as at the reporting date of 30 June, 2005. The share price achieved an annual peak of EUR 5.83 on 23 June, 2005, equivalent to a 42 percent increase.

The share price gained positive impetus in the first six-month period as a result of, amongst other things, the purchasing study published in mid-February by GBC Research, the EUR 6 upside target, announcement of the acquisition of Dutch online marketer, ResultOnline B.V., in addition to publication of the group figures for the business year 2004. By contrast, publication of the company results for the first quarter of 2005 only influenced the quoted price on the day of publication.

Overall, ad pepper media is able to look back at the pleasing development of its share price during the first half of 2005 and is confident that both the strategic alignment of the company as well as its targeted orientation towards constantly increasing profits will continue to have a positive influence on the value of ad pepper media shares in the current business year.

Comparison with the development of the Prime All Share Index demonstrates that, with a rise in share price of 33 percent (as at 30 June, 2005), ad pepper media has again clearly succeeded in breaking away from Prime All Share Index performance, which concluded the first half of the business year with a plus of 8 percent.

Under **www.adpepper.com** (Investor Relations), interested parties have the opportunity to obtain comprehensive company information and to download financial statements and reports. In addition, we are always there to answer questions of our investors and parties interested in potential investments by phone or email.

#### Outlook

With its turnover growth rates for the first six months of the year, ad pepper media has successfully outperformed the market. Thanks to the continually expanding order intake and increasing accounting volume, we anticipate significant growth in turnover during the upcoming quarters as compared to the quarterly periods of the previous year. Although the summer months are traditionally hampered by the holiday period, major international campaigns are already in the offing for the final months of the year. Through the significantly increased reach provided by the takeover of Nedstat Basic, we also expect to see a marked improvement in gross margins that, in turn, should translate into a considerable increase in profits.

Many investors are also expressing this positive assessment, as numerous international investor presentations illustrate, with the result that we also anticipate a further rise in the share price.

### Notes to the consolidated interims financial statements as of June 30th, 2005

# Basis for the preparation of the quarter-end financial reports

The current quarter-end financial reports for ad pepper media International N.V. were prepared according to the provisions of the International Financial Reporting Standards (IFRS) as applicable on the closing date and are presented in Euros. The comparative figures of previous periods were determined and adjusted accordingly. The quarter-end financial reports meet the requirements of IAS34.

### **Accounting principles**

The accounting priciples applied to these interims financial statements do not materially differ from the priciples as applied for the US-GAAP Annual Report as of December 31st, 2004.

Differences are illustrated under the heading "Conversion to International Financial Reporting Standards".

#### **Business combinations**

As of March 1st, 2005, ad pepper media Benelux B.V. acquired a 100 percent interest in the Dutch online marketing agency ResultOnline B.V. The company was founded in 1999 and is one of the leading text-based online marketing companies in the Netherlands. ResultOnline has a firm base of customers and website partners, offering primarily performance-linked marketing using its own technology, and has been operating profitably since 2001.

ad pepper media's leading lead generation solutions and its growing optin email database combined with ResultOnline's text-based marketing experience and its broad customer and website base will make the two companies the Netherlands' leading supplier of online data marketing solutions. Synergies will also contribute to long-term profitability.

The provisional purchase price is EUR 1,585,670, part of which is being paid in the form of 30,678 shares in ad pepper media International N.V. The value per share of EUR 5.374 reflects the average closing price of the last ten trading days before closing date. An additional purchase price of EUR 100,000 is contingent upon the achievement of performance targets.

The purchase price exceeds the values of net assets, which are shown below, by EUR 1,389,425.

Values of assets and liabilities at acquisition					
	kEUR				
Intangible assets	50,2				
Equipments, net	12,1				
Noncurrent assets	62,3				
Trade receivables	56,8				
Prepaid expenses and other current assets	51,4				
Cash and cash equivalents	358,9				
Current assets	467,1				
Total assets	529,4				
Tuesda lieleilistaa	62.2				
Trade liabilities	63,2				
Other current liabilities	27,4				
Accruals	142,7				
Total liabilities	233,3				
Net assets	296.1				

Result Online contributed with kEUR 43 to the consolidated income of the period. Assuming that the acquisition had been effective at beginning of the reporting period the proforma revenues would have been kEUR 11,973 and the proforma net income kEUR 112.

### **Segment reporting**

The various products and services of ad pepper media do not materially differ with regards to risk and income. Internal financial reporting as well as the management structure primarily focus on geographical regions. Accordingly, primary reporting is provided for the following summarized segments:

- Central Europe including Germany, the Netherlands and Slovakia
- Northern Europe including Denmark and Sweden
- Western Europe including Great Britain, France, Spain and Italy
- USA

# Conversion to International Financial Reporting Standards

Due to adjustments of comparative figures of previous years, the first time adoption of International Financial Reporting Standards leads to differences in equity and net income as presented according to IFRS compared to those amounts as previously presented according to US-GAAP. The comparative values were determined as if IAS/IFRS had been adopted all the time. The resulting differences of balance sheet items

as reported in the consolidated financial statements as of December 31st, 2003 according to US-GAAP compared to the opening balances as of January 1st, 2004 according to IFRS were recognized in the accumulated deficit.

According to IFRS1 (First Time Adoption of International Financial Reporting Standards) following is the reconciliation of equity according to US-GAAP to the equity according to IFRS:

EUR	Notes*	US-GAAP January 1st, 2004	Adjustments	IFRS January 1st, 2004
Share capital		1,115,500		1,115,500

Revaluation surplus	b		108,369	108,369
Accumulated deficit	а	-21,283,587	-1,750,303	-23,033,890
Translation adjustment	b		21,609	21,609
Other comprehensive income	b	129,978	-129,978	
Shareholders' equity		36,590,285	0	36,590,285

EUR	Notes*	US-GAAP December 31st, 2004	Adjustments	IFRS December 31st, 2004
		1 115 500		4 445 500
Share capital		1,115,500		1,115,500
Additional paid-in capital	a,c	56,795,173	2,932,185	59,727,358
Treasury stock	С	-68,937	-993,983	-1,062,920
Revaluation surplus	b		-23,048	-23,048
Accumulated deficit	а	-17,712,542	-1,938,202	-19,650,744
Translation adjustment	b		-55,127	-55,127
Other comprehensive income	b	-78,175	78,175	
Shareholders' equity		40,051,019	0	40,051,019

The following table illustrates the impact of adopting IFRS on consolidated net gain:

EUR	Notes*	01.0131.12.2004	01.0130.06.2004
Consolidated net gain US	CAAD	4,341,888	770 042
Employee stock options	a a	-392,707	770,843 -204,808
Consolidated net gain IFR	RS	3,949,181	566,035

### \*Notes:

- a) According to APB25 the company had not reported expenses for employee stock option plans in its US-GAAP financial statements. IFRS2, in contrary, requires the recognition of such compensation components in the income statements. Thus, the differences are recorded in net gain, in accumulated losses and the additional paid-in capital.
- b) Accumulated other comprehensive income in the US-GAAP statements contained currency translation differences from the consolidation of companies that do not have the Euro as functional currency, as well as a revaluation reserves from unrealized losses on securities. In the IFRS statements, these elements are stated seperately as translation adjustment and financial revaluation surplus.

c) Treasury stock was recognised at nominal value in the US-GAAP financial statements. The difference between purchase price and nominal value was balanced with the additional paid-in capital. Treasury stock is now recognised at purchase cost in the IFRS financial statements.

#### Own shares

By shareholders' resolution, ad pepper media was authorized to repurchase treasury stock of up to 1,115,500 own shares. As of June 30th, 2005 the company held 645,690 own shares at a nominal value of EUR 0.10 each which equals 5.79 percent of the share capital. According to a shareholder resolution those shares can be used for acquisitions or stock option plans.

Of the treasury shares acquired by the company, in the first six months of 2005 7,500 shares at an exercise price of EUR 1.78, 600 shares at an exercise price of EUR 1.33, 1.400 shares at an exercise price of EUR 2.73 and 3,500 shares at an exercise price of EUR 4.45 have been used for the execution of employee stock options and 30,678 more shares at a price of EUR 5.374 have been used as purchase price payment in the context of the acquisition of ResultOnline.

### Occurrences since the end of the second quarter, 2005

Effective July 1st, ad pepper media took over the free website analytics solution Nedstat Basic from Nedstat B.V., the European leader in website analytics.

With this asset transaction, ad pepper media acquires all the respective rights associated with the world's most frequently used free website analytics solution. Nedstat Basic is an ASP based solution enabling webmasters to measure all the important indicators such as traffic, user behaviour, content and offer performance.

The provisional purchase price of this transaction is million EUR 3 plus a limited earn-out component. The acquisition will be executed by Web Measurement Services B.V, a newly formed and wholly owned ad pepper media subsidiary based in Hoofddorp, Netherlands. The purchase price exceeds the values of net assets acquired by million EUR 1.8.

Nedstat Basic is actively used by more than 600,000 webmasters on approximately 1 million websites around the world and has been continuously growing since its launch in 1996.

### Stock options and shareholdings

As of June 30th, 2005, 1,490,850 stock options exist within the framework of stock option plans. The exchange ratio for each of the stock options is one share per option. The exercise prices are in a range of EUR 1.33 and EUR 13.50.

The following table lists the individual holdings of shares and option rights of the members of the Supervisory and Managing Board as well as employees:
